```
ALUMINIUM SOLAR BOX COOKER PREDICTION
--------------------------------------
Absorber material: Black-coated aluminium
Reflector angle: 90 degrees
Insulation: Sawdust
Glass cover: Single glazing
External box: Plywood
Water load: None

Aluminium plate mass: 0.1012 kg
Aluminium plate heat capacity: 91.12 J/K
Total assumed thermal capacity: 1591.12 J/K

Initial plate temperature: 33.00 deg C
Peak plate temperature: 108.41 deg C
Time to peak: 227.00 minutes
Peak clock time: 12.78 hours
Temperature at 4 PM: 71.25 deg C
Maximum temperature rise: 75.41 deg C
